

REFERRAL PARTNERSHIP PROGRAMME

JP Fund Services (Suisse) SA promotes and supports JP Fund Foundations (Cayman) Ltd in offering facilitation services to global fund and asset managers. The management and staff have a wealth of financial markets experience in the world's major financial centres and understand, at first hand, the benefits of pooling assets under management into a fund structure.

The company was formed to cater for aspiring or existing fund and asset managers who find their level of assets under management or specialised strategies make it difficult to establish a fund. The nature of the solution enables managers to leave the structural formalities and paperwork to specialists for timely and cost effective results.

We understand the benefits of partnering with individuals and companies operating in the financial markets industry as a way to promote our services and we believe in creating strong partnerships with mutual benefits.

We offer financial compensation referred clients; we acknowledge the value of a qualified introduction and will share in the trading revenues

Financial institutions and brokers receive the benefit of increasing the offering to their customers and reducing the amount of administration necessary to maintain the client relationships. We will discuss and agree terms and conditions on a case by case basis as our business model offers a variety of flexible solutions.

A referring agent relationship with JP Fund Services will give you the opportunity to offer your valued clients and acquaintances access to our unique range of services.

Please contact us to progress partnership discussions.
